# **Objetivo General:**

Modelar clases con relaciones 1 a 1 utilizando diagramas UML. Identificar correctamente el tipo de relación (asociación, agregación, composición, dependencia) y su dirección, y llevarlas a implementación en Java.

# Caso Práctico:

Desarrollar los siguientes ejercicios en Java. Cada uno deberá incluir:

- Diagrama UML
- Tipo de relación (asociación, agregación, composición, dependencia)
- Dirección (unidireccional o bidireccional)
- Implementación de las clases con atributos y relaciones definidas
